List of Experiments

A.Y. 2025-26 Semester: Odd Subject: 4CP01 Name: Compiler Design	
Sr. No.	**Expriment**
1	Write a program to generate tokens from given string.
2	Write a program to check whether input string is accepted by given DFA or not.
3	Write a program to remove left recursion from given grammar.
4	Write a program to perform left factoring on given grammar.
5	Write a program to find first and follow of given grammar.
6	Write a program to check grammar is LL (1) is or not.
7	Write a program to implement shift reduce parser for given grammar.
8	Write a program to generate a symbol table using hashing.
9	Write a program which generates Quadruple table for the given postfix string.
10	Write a program to generate a token using LEX
11	Write a lex program to count number of vowels and consonants from given string.
12	Write a lex program to convert form: words format to number format.
13	Write a program for calculator using LEX.
14	Write a lex program to recognize roll number of all branches of BVM.
15	Write a lex program to check number is divisible by 7 or not.
16	Write a lex program to find a length of given word.
17	Write a program for calculator using YACC.
18	Write a program to convert from infix to postfix.
